INTRODUCTION

Your mates think you're seeing things through magnolia-tinted glasses, but you know you're on to a good thing with this woman. Living together feels like the natural next step for the relationship. It is also a hell of a lot cheaper than living apart. With skill and foresight, couples can live together for years without any long-term ill effects like marriage or children.

Perhaps you are currently living apart and considering whether living together is the right thing to do, or maybe you have already moved in with your girl and want to know how to maintain the initial domestic bliss. Either way, this book will prove invaluable in helping you to understand her and avoid potential cohabitation pitfalls.

Keep it in the bathroom as a handy reference manual... only keep it away from the hair-removal wax.
