Introduction

As I write, there are 162,042,117,562 websites on the internet. Of these 161,983,424,031 can certainly be considered to be strange. But there are far fewer that are truly weird and even fewer that are what-on-earth-is-that-all-about-weird. This little book brings together the weirdest of these weird sites for your amusement. When visiting the sites you will meet some rich, ugly people who desperately want to marry you, have the opportunity to join The Interplanetary Society for the Hard of Thinking and be shown how to send a plague of wasps to 'destroy' the websites that you hate. So, power up that old cathode-ray tube and get surfing!

Notes

Due to the constant use of the letter 'w' every time someone types a website name into their browser, there is now a worldwide shortage of 'w's. Because of this we have not included the 'www' at the start of the websites listed in this book. Most of the time you can reach a site without the 'www.' but if a site doesn't load, try adding 'www.' to the start of the website name.

At the moment none of the sites listed contain pornographic material, though some may contain mild nudity and/or slightly bad language. However, websites do change over time so, as always on the internet, surf with caution. Please note also that specific examples mentioned for sites may well have been updated by the time

introduction

you view them, but the weirdness factor of the site will doubtless remain!
